Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claims 1-5 is withdrawn in view of the newly discovered reference(s) to Seidler. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3, 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Seidler (US 6,796,485).

Re claim 1, Seidler discloses

Providing a printed circuit board (100) with solder (col. 1, lines 54-59)

Providing a shielding can (10) with an extra amount of solder (70)

Placing the shield can (10) on the board (col. 2, line 33)

Heating the PCB and the shield can (reflowed step, col. 2, line 37)

Cooling the PCB and the shield can (col. 2, line 38)

Re claim 3, 5, see Figs 4, 5

Claim Rejections - 35 USC § 103

Art Unit: 2831

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seidler.

The teaching of Seidler as discussed above does not disclose the extra amount of solder being provided by a bath of molten solder or a screen printing process. It is well known in the electrical art to use a bath of molten solder or a screen printing process. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the invention of Seidler by employing the bath of molten solder or a screen printing process for intended purpose.
